

ECG Erdgas-Consult

SUCCESS BEGINS WITH UNDERSTANDING
ECG – WE DELIVER PROCESSES THAT WORK

“WE ARE WELL-PREPARED FOR FUTURE DEVELOPMENTS ON THE GAS MARKET.”

IT AND GAS INDUSTRY EXPERTISE

As specialist supplier of software, consultancy and process services, we are thoroughly conversant with gas industry processes.

We harmonise advanced IT requirements with in-depth energy industry expertise and offer our customers well-designed software solutions on this basis. Network and storage facility operators have recognised our potential and place their trust in our systems.

COMMERCIAL PROCESSES

Our products and services support the commercial processes of customers in various energy market roles. Our experience ensures that we offer tried and tested solutions for gas industry business models and processes that reach the highest quality levels in terms of organisational structures and procedures, gas industry requirements and information technology.

**“MTS GIVES YOU A SURE COMMAND
OF GAS INDUSTRY PROCESSES.”**

ECG

COMPANY

SOLUTIONS FOR ALL MARKET ROLES

ECG's key product is the MTS software family (Management System for Transport and Storage, Trading and Shipping). MTS covers the commercial processes of the value stream, offering a tailor-made approach to all segments of the energy industry as well as innovative solutions for market roles within the German and European gas market. These include transport, trading and storage systems as well as European gas and capacity trading and cooperation platforms and energy exchanges.

ROLE-SPECIFIC PRODUCT PACKAGES

To provide optimum support for different market roles, ECG has grouped the MTS system into a number of different role-specific packages adapted to market segments both in terms of the products and modules included and in terms of basic configuration. Service-oriented interfaces facilitate integration into existing system architectures.

“ENERGY INDUSTRY EXPERTISE – A PREREQUISITE FOR EFFECTIVE IT SOLUTIONS.”

KNOW-HOW AND CONSULTANCY

Thanks to our specialist know-how and our experience in the industry, we have a thorough command of gas industry processes.

We provide advice and support for processes of the energy industry in gas trading, transport and storage and ensure sustained, target-oriented support for tailored software solutions for our customers in Germany and throughout Europe.

QUALITY MANAGEMENT AND SUPPORT

To ensure high levels of customer satisfaction, our quality management approach is based on defined standards and the continuous improvement of our processes. They are structured in accordance with ITIL standard best practice recommendations and effectively optimise the structure of our results. Our specialist and technical support and our 24/7 hotline ensure high availability for all our systems.

“IDENTIFYING AND BENEFITING FROM POINTS IN COMMON.”

ROBOTRON|ECG SOLUTIONS

The partnership combines the systems of the two companies to provide a software portfolio that is unique on the marketplace and offers companies active in the energy sector integrated IT solutions from a single source.

Especially as regards trading and networks, we offer holistic process support adapted to the requirements of regulation and the market.

A UNIQUE SOFTWARE PORTFOLIO

The joint solution portfolio comprising the **robotron**e*count**, **robotron**e*sales** and MTS product families offers processes and interfaces for balancing group, transmission system and distribution system operators including interaction with traders, sales companies and platforms. As regards the competitive environment, the portfolio covers trading, purchasing, transport and storage logistics as well as sales to resellers, special customers and consumers, including energy data management.

“TAKING A PROACTIVE APPROACH TO SOCIAL RESPONSIBILITY.”

LAYING THE FOUNDATIONS

Apart from sponsorship and donations for schools, for example covering computer equipment, we also provide training possibilities for students. The objective is to offer university and secondary school students the best possible start to their career. This is why ECG has financed and organised projects and events together with education partners in eastern Germany since 2002.

COMMITMENT TO EDUCATION

During their courses, students can gain practical experience with ECG through internships or study projects. Annual participation in the German Girls' Day and successful cooperation with community colleges and high schools are other key elements in our commitment to education.

“FACING THE FUTURE CONFIDENTLY WITH A STRONG TEAM.”

ENERGY INDUSTRY REQUIREMENTS

High skills, consolidated professional knowledge and practical experience in the industry develop effective software solutions in accordance with energy industry requirements and ensure smoothly functioning processes.

GAS MARKET AND DEVELOPMENTS

A dedicated team of computer specialists, scientists and economists means a rapid and goal-oriented detection of the current developments on the gas market and a realisation of tailor-made solutions for our customers. The high commitment of our employees and their constructive cooperation as team players lay the foundations for our performance and our success.
